

E Waste is Australia's biggest emerging waste challenge. What is your business doing about it?

ASSET RECYCLING

When it's time to dispose of IT assets, there are four major challenges for your business:

- Ensuring you obtain maximum residual value for your equipment
- Compliance with environmental legislation
- Secure removal of all corporate data and identification
- Ensuring the work is carried out with minimal disruption to your business

JUST Recycle IT is the partner you can work with in this area with total peace of mind. Our core activity is IT asset recycling and we offer the skills, resources and experience of more than 10 years in the business. Plus we are the only business of our kind to offer a complete service from start to finish.

Our philosophy is to fully embrace the 3 R's of recycling—Reduce, Reuse, Recycle. Where possible, we aim to reduce the amount of electrical items going to landfill by enabling items to be reused through our remarketing program. All unusable items are then environmentally recycled.

Our complete IT asset recycling package includes:

- Fair market values offered against most end-of-life IT equipment—quoted in advance with values which can be guaranteed (subject to Terms & Conditions). No retrospective charges are made for any service.
- Data Erasure—Certificated proof of erasure for every hard drive, backed up by a comprehensive insurance policy.
- A managed disposal service that can be fully integrated with roll-out programs and other service providers.

- All disposal services are environmentally sound.
- Full audit trail with itemised reporting.
- Full product grading.
- The assurance of a zero-landfill policy, encouraging environmental best-practice.
- Flexible collection times.
- Nationwide collection facilities.
- An extensive range of IT Managed Services to provide effective end-to-end solutions.
- In addition to our standard pricing matrix, JUST Recycle IT can also assist with more unusual, high value equipment—working on your behalf to obtain the best possible current market value.

JUST Recycle IT also partners with resellers, IT manufacturers, leasing companies and systems integrators to create a “single source” concept where required.
