

Can you afford not to use us?

ASSET REDEPLOYMENT

Regularly updating your IT equipment can be an expensive and time consuming exercise. A cost-effective alternative to purchasing new equipment and extending the IT product lifecycle, is to re-utilise your existing equipment.

JUST Recycle IT can conduct the following services on potentially redundant IT equipment:

- Cleanse data securely.
- Refurbish IT equipment where required.
- Upgrade the specification of hardware to the required standard.
- Reload the operating system and applications before delivering and installing to the required desktop.

Items can then be redeployed within your organisation.

This service is particularly worth considering where departments within your company use higher specification equipment than others, as it allows you to cascade IT equipment down to departments / users with lesser technological requirements.

Cost savings are not the only benefit of asset redeployment; it also forms the basis of a sound and true recycling policy where the emphasis is on the reuse of IT equipment. As a business, this is an extremely effective way of minimising your carbon footprint.

The complete JUST Recycle IT service includes a full reporting process so that the management of your company's assets remains 100% accurate.

Employee Purchase Program

An alternative use for assets is to offer them to your staff as part of a managed arms-length transaction. This is a fantastic way of extending the assets' lifespan whilst increasing staff loyalty; by providing employees and their family / friends with an ability to obtain computers for a fraction of the price.

JUST Recycle IT can fully co-ordinate this process, from collection and secure data erasure, through to offering the items for sale via our secure branded website.

We take care of all payments and insurance implications. Warranty and technical support of selling PC's is provided whilst ensuring it is an arms-length transaction for you as an employer; freeing up your IT department and maintaining good employee relationships.
