

More than two million computers were sold in Australia last year; only 5% were recycled and 20% will be stored in cupboards.*

ASSET DECOMMISSIONING

JUST Recycle IT's experience in major, large scale, end-of-life IT projects over the past decade ensures that every detail of your asset decommissioning is managed from desktop removal right through to asset disposal.

Using our experienced staff and our unique tracking system, JUSTICE, you can free up the indirect drain on your IT staff resources, and outsource the physically challenging and time consuming processes associated with an IT infrastructure refresh.

JUST Recycle IT's decommissioning staff are trained in occupational health and safety, customer service and logistics-management. This means that you can focus your energies on the refresh, whilst we work seamlessly with you to decommission your assets, with minimal intrusion and maximum efficiency.

Unmanaged Service

Using the processes within JUSTICE you have the freedom to pre-select which of our services you wish to use; obtain a quote and book a time and date for the asset collection from a single collection point.

Managed Service

Alternatively, we can fully project manage the entire decommissioning process from initial phone call and refresh supplier liaison right through to desktop refresh, on-site logging, data-erasure, packaging and transportation.

Whichever service you choose, you are guaranteed that JUST Recycle IT will organise the complete logistics surrounding the removal of your redundant IT equipment, ensuring minimal disruption to your business.
